OF THE

**DEPENDENT RESURVEY OF THE SEVENTH STANDARD PARALLEL NORTH,
THROUGH RANGE 18 EAST (N. BDY.), THE SOUTH AND EAST BOUNDARIES**

AND A PORTION OF THE SUBDIVISIONAL LINES,

AND

THE SURVEY OF A PORTION OF THE SUBDIVISIONAL LINES,

TOWNSHIP 28 NORTH, RANGE 18 EAST,

OF THE GILA AND SALT RIVER MERIDIAN,

IN THE STATE OF ARIZONA.

EXECUTED BY

Joe R. Salazar and Daniel L. Maxey, Cadastral Surveyors

**Under Special Instructions dated March 23, 1999, approved March 25, 1999,
which provided for the surveys included under Group No. 841, and
assignment instructions dated July 26, 1999, and May 31, 2000.**

Survey commenced August 2, 1999

Survey completed August 9, 2000

T. 28 N., R. 18 E., Gila and Salt River Meridian, Arizona

CHAINS

The following field notes describe the dependent resurvey of the Seventh Standard Parallel North, through Range 18 East (N. Bdy.), the south and east boundaries and a portion of the subdivisional lines, and the survey of a portion of the subdivisional lines, T. 28 N., R. 18 E., Gila and Salt River Meridian, Arizona.

The history of surveys pertaining to this resurvey is as follows:

John C. Smith surveyed the Seventh Stan. Parallel N., through R. 18 E. (N. bdy.), the S., E. and W. boundaries and a portion of the subdivisional lines and subdivided certain sections by the three-mile method. Sidney E. Blout resurveyed the Seventh Stan. Parallel N., through R. 18 E., in 1908-09. Stephen K. Hansen dependently resurveyed the Seventh Stan. Parallel N. through R. 17 E. (N. bdy.), in 1998-99. Joe R. Salazar dependently resurveyed the west boundary, in 1999.

During the course of the survey, certain corners dated 1908 were recovered which are not of record. Documents exist that indicate Sidney E. Blout conducted surveys and resurveys in this township while performing Indian allotment surveys under detail to the U. S. Indian Service during this time period. The corners established by Blout have been in position for over ninety years, and their rejection could disturb satisfactory local conditions. In addition, direct evidence of Smith's survey is so limited that it is now impossible to reestablish his survey on that basis. For these reasons, Blout's monuments have been adopted in this survey and resurvey.

Because there is no official record of Blout's measurements or what he may or may not have recovered of Smith's survey, and due to the consistency of Blout's corner locations, lost corners on the south and east boundary were reestablished equidistant from their respective controlling corners. Lost section corners and quarter section corners on longitudinal subdivisional lines were reestablished equidistant from controlling corners to the north and south. Quarter section corners on the latitudinal subdivisional lines were reestablished at midpoint between controlling section corners. Lost quarter section corners on the lines running into the north and west boundaries were reestablished at forty chains with the excess and deficiency placed in the last half mile. Areas against these boundaries were relotted to reflect their actual acreage. This township is entirely tribal land, and the subdivision of sections by the three mile-method is officially superceded by this resurvey.

T. 28 N., R. 18 E., Gila and Salt River Meridian, Arizona

CHAINS

The survey was executed in accordance with the specifications as set forth in the Manual of Instructions for the Survey of the Public Lands of the United States, 1973, and the Special Instructions dated March 23, 1999, for Group No. 841, Arizona.

The true meridian direction and length of all lines were determined by real time kinematic global positioning system observations using Trimble Navigation 4400 model receivers.

Preliminary to the resurvey, the lines of the prior surveys were retraced and search was made for all corners and other calls of record. Identified corners were remonumented in their original positions. Lost corners on the 7th Stan. Par. N. were reestablished and remonumented at proportionate positions based on the official record. The retracement data were thoroughly verified and only the true line field notes are given herein.

Geodetic control was derived from first order U. S. Geological Survey triangulation station TALA 1965, as published by the National Geodetic Survey, NAD 83 (1992). The geographic position of the cor. of Tps. 27 and 28 N., Rgs. 18 and 19 E., is as follows:

Latitude: 35° 46' 48.91" N. Longitude: 110° 21' 26.17" W.

The mean magnetic declination is 12½° E.

Dependent Resurvey of the 7th Stan. Par. N. through R. 18 E. (N. Bdy.), T. 28 N., R. 18 E., Gila and Salt River Mer., Arizona

Restoring the resurvey executed by
Sidney E. Blout, in 1908-09

Beginning at the stan. cor. of Tps. 29 N., Rgs. 18 and 19 E., monumented with an iron post, 3 ins. diam., firmly set, projecting 36 ins. above the ground, in a mound of stone, 4 ft. base, 2½ ft. high, with brass cap mkd. T29N R18E R19E S36 S31.

Add the marks SC 1999 to the brass cap.

Deposit a magnet in a white plastic case alongside the iron post.

S. 89°50' W., on the S. bdy. of sec. 36.

Over broken, rolling desert terrain, through scattered creosote and cacti.

Dependent Resurvey of the 7th Stan. Par. N., through R. 18 E.
(N. Bdy.), T. 28 N., R. 18 E., Gila and Salt River Meridian, Arizona

CHAINS	GENERAL DESCRIPTION
	<p data-bbox="420 436 1430 495">This survey is located on the Hopi Indian Reservation, near the town of Polacca.</p> <p data-bbox="420 531 1446 653">A wide variety of terrain is found in the area. Many of the low lying areas are used for dryland farming. Much of the township contains rolling sand dunes and grassland, the remainder of the township is rocky and mountainous.</p> <p data-bbox="420 688 1442 747">Timber in the higher terrain consists of juniper and pinon pine. The grass lands are used for the grazing of cattle and sheep.</p> <p data-bbox="420 783 1393 808">Arizona highway 264 passes through a portion of the township.</p> <p data-bbox="420 844 1312 869">Elevation ranges from 5700 to 6300 feet above sea level.</p> <p data-bbox="420 905 1446 993">Some past coal mining activity was noted along the northern portion of the township, no evidence of present mineral activity was noted.</p> <p data-bbox="420 1029 1430 1150">The mean magnetic declination of $12\frac{1}{2}^{\circ}$ E., was derived from the United States Geological Survey computer program GEOMAG, utilizing the World Magnetic Model for Epoch 2000 for the dates of survey.</p>

FIELD ASSISTANTS

[illegible]

CERTIFICATE OF SURVEY

We, Joe R. Salazar and Daniel L. Maxey, Cadastral Surveyors, HEREBY CERTIFY upon honor, that in pursuance of special instructions bearing date of the 23rd day of March, 1999, We have dependently resurveyed the Seventh Standard Parallel North, through Range 18 East (N. bdy.), the south and east boundaries and a portion of the subdivisional lines and surveyed a portion of the subdivisional lines, T. 28 N., R. 18 E., Gila and Salt River Meridian, Arizona, which are represented in the foregoing field notes as having been executed by us and under our direction. Said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.

CERTIFICATE OF APPROVAL

BUREAU OF LAND MANAGEMENT
Phoenix, Arizona

The foregoing field notes of the dependant resurvey of the Seventh Standard Parallel North, through Range 18 East (N. bdy.), the south and east boundaries and a portion of the subdivisional lines and the survey of a portion of the subdivisional lines, T. 28 N., R. 18 E., Gila and Salt River Meridian, Arizona, executed by Joe R. Salazar and Daniel L. Maxey, Cadastral Surveyors, having been critically examined and found correct, are hereby approved.

August 20, 2001
